Introduction

I'm an experienced professional fresh out of college, skilled in building resilient applications. My expertise spans programming languages, system-level development, web frameworks, DevOps practices, security, and AI. With a versatile skill set and unwavering commitment to excellence, I bring value to any project.

Skills

Languages: C, Java, JavaScript,

Technical/ Framework: HTML, CSS, Angular, MySQL, Postgress , Spring Boot

Developer Tools: VS Code, GitHub, Git, GitLab

Projects

Zomato Clone

- Built a Zomato clone using **Angular**, **Spring Boot**, and **MySQL** for dynamic UI and data management.
- Integrated **Firebase Authentication** for user login and data synchronization.
- Designed and tested RESTful APIs using **Postman** for seamless communication between front-end and back-end.

Reddit

- Built a Reddit clone using **React**, **Node.js**, and **MongoDB** for an interactive UI and efficient data handling.
- Implemented secure login and session management using **JWT** (JSON Web Tokens) and **Firebase Authentication**.
- Created and tested RESTful APIs with **Postman** to handle user posts, comments, and upvotes seamlessly.

Spotify Clone

- Developed a music streaming app using **Vue.js**, **Spring Boot**, and **MySQL**
- **Implemented user authentication with Spring Security and OAuth 2.0.**
- **Designed and tested RESTful APIs with Postman and added real-time music syncing via WebSockets.**

Area of interest

- Machine learning
- Web Development
- AI Agents
- App Development

Certificate

- Data Structures with C Programming - Udemy
- AWS
- Ethical Decision Making for Success in the Tech Industry - Coursera
- Business for Good: Fundamentals of Corporate Responsibility - Coursera
- Corporate Governance - Coursera
- Generative AI – Google Cloud

Leadership/Extracurricular

- Solved 200+ Questions on GFG & Leetcode
- **Organized workshops** on coding and robotics for underprivileged students, empowering 200+ participants with technical skills.
- Volunteered with a non-profit organization to develop a **local language learning app**, promoting literacy in rural communities.

Education

Kalinga Institute of Industrial Technology

2022-2026

Bachelor of Computer Science
